

# Clear your browser history in Microsoft Edge

Just as Safari is the stock browser on Apple devices, so is Microsoft Edge on PCs running Windows 10. It's Microsoft's replacement for Internet Explorer after it was put out to pasture.

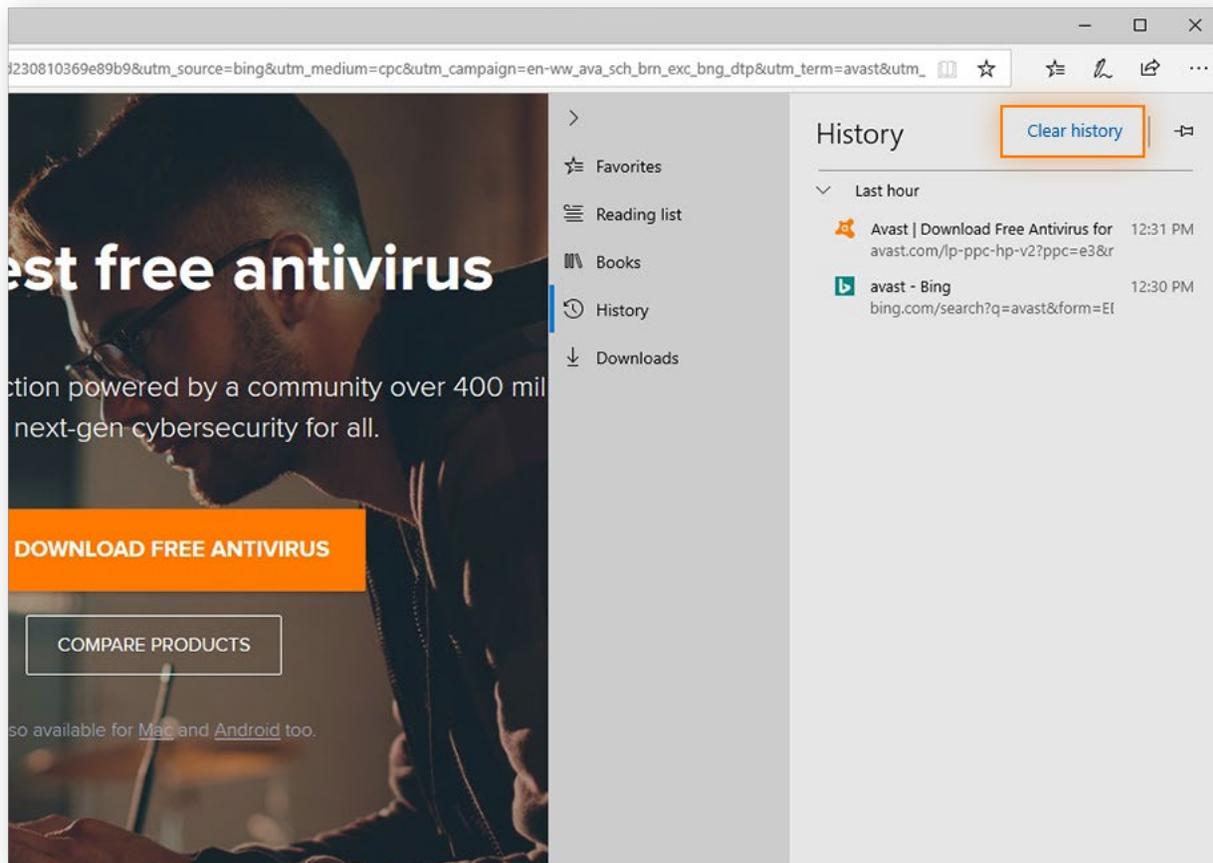

## On desktop

If you're a desktop Edge user, let's delete your browsing history on Windows 10. As with other browsers, this process is on the simple side.

1. Open Microsoft Edge, click the three dots to the right of the address bar, and then select **History**.

2. In the History menu, click **Clear History** (up at the top in blue lettering).

3. Confirm that there's a check in the box for **Browsing history**, then click **Clear** — and that's how to clear the history on Windows 10. If you like, you can configure Edge to clear your browser history every time you close the browser by switching the toggle at the bottom to **On**.
