Clear your browser history in Mozilla Firefox

Mozilla Firefox is a popular open-source browser available on most devices and operating systems. Here, we show you how to clear your Firefox browsing history on both desktop and mobile.

On desktop

Firefox makes it convenient to delete both your browsing history as well as your search history from the same place. With Firefox open on your PC or Mac, perform the following steps:

 Click the Library icon – it looks like a minimalist stack of books – then select History from the drop-down menu.
